Young Men especially, who have become the victims of Solitary Vice, that dreadful and destructive habit which aunually recept to an untimely grave thousands of young men of the most exalted talents and brilliant intellect, who might otherwise have entranced list-ning Senates with the thunders of eloquence, or waked to ecstacy the living lyre, may call with full confidence.

DR. JOHNSTON,

Member of the Royal College of Surgeons, London, Graduate from one of the nost eminent Colleges of the United States, and the greater part of whose life has been spent in the Hospitals of London, Paris, Philadelphia, and elsewhere, has effected some of the most astonishing cures that were ever known. Many troubled with ringing in the ears and head when asleep, great nervousness, being alarmed at sudden sounds, and bashfulness, with frequent blushing, attonicately.

TAKE PARTICULAR NOTICE.

cd sometimes with derangement of mind, were cured immediately.

TAKE PARTICULAR NOTICE.

Dr. J. addresses all those who have injured themselves by private and improper indulgences, that secret and solidary hebit, which ruin both body and mind, unfitting them for either business or society.

These are some of the sad and melanchely effects produced by early habits of youth, viz. Weakness of the Back and Limbs, Pains in the Head, Dinness of Sight, Loss of Muscular Power, Palpitation of the Heart, Dyspepsia, Nervous Irritability, Derangement of the Digestive Functions, General Debility, Symptoms of Consumption, &c., &c.

Mentally.—The fearful effects on the mind are much to be dreaded. Loss of Memory, Confusion of Ideas, Depression of Spirits, Evil Forebodings, Aversion of Society, Self Distrust, Love of Solitude, Timidity, &c., are some of the evils produced.

NERVOUS DEBILITY.

Weakness of the system, Nervous Deblitty and premature decay generally arise from the destructive habit of youth, that solitary practice so fatal to the healthful existence of man, and it is the young who are most apt to become its Victims, from an ignorance of the dangers to which they subject themselves. Parents and Guardians are often missed with respect to the cause or source of disease in their sons and wards. Alas! how often do they ascribe to other causes the wasting of the frame, Palpitation of the Heart, Dyspeptal, Indigestion, derangement of the Nervous System, Cough, and Symptoms of Consumption; also those serious Mental effects, such as loss of Memory, Depression of Spirits, or peculiar fits of Melancholy, when the truth is, they have been caused by Indulging in Pernicious but alluring practices, destructive to both Body and Mind. Thus are swept from existence thousands who might have been of use to their Country, a pleasure to their friends, and ornaments to Society. NERVOUS DEBILITY.

Society.

DR. JOHNSTON'S INVIGORATING REMEDY FOR ORGANIO WEAKNESS.

This grand and important Remedy has restored strength
and vigor to thousands of the most debilitated individuals,
many who had lost all hopes, and been abandoned to die.

By its complete invigoration of the Nervous System, the
whole faculties become restored to their proper power and
functions, and the fellen fabric of life is raised up to beauty,
consistency and duration, upon the rules of an emclated consistency and duration, upon the ruins of an emaciated and premature decline, to sound and pristine health. Oh, how happy have hundreds of misguided youths been made, who have been suddenly restored to health from the devis-tations of those terrific miladies which result from indiscre-

It is with the greatest reluctance that Dr. Johnston permits his card to appear before the public, deeming it unprofessional for a physician to advertise; but unless he did so, the afflicted, especially strangers, could not fail to fall into the hands of these imprudent, boasting impostors—individuals destitute of knowledge, name, and character—pediars, heckmaker, mechanics, &c. advertising themselves as physically in the second of shoemakers, mechanics, &c., advertising themselves as phy icians; ignorant quacks, who keep you trifling month af month, as long as possible, and in despair leave you will ruined health to sigh over your galling disappointment. The undersigned, being the duly appointed Agent of Spratt's Electrican and Electro-Metallurgist Lightning.

In a superior Reds, of Spiral-twisted, Carbonized Annealed Iron, with Zine Protectors, and Electro-positive elements combined in their manufacture; thus rendering them equal to copper as conductors. They are in ten-feet lengths, with accurately-fitted brass-serew connecting joints, an entire new style of metallic (patented) attachments, for brick or frame buildings; also, glass isolaters, of a novel and ingenious construction, (pacented), forming a lock; the whole mounted with a solid platinum sliver point (patented), twelve inches long, surrounded at the base with three angular negative magnets, which possess the power, to an extraordinary extent, of discharging the opposite elements of the most fragulficent and perfect silent conductor ever presented to the public.

Safety has not been compromised by affording these axcellent rods at such low rates; the greatest attention has been given to their construction, so as to be readily attached. The astonishing power of the negative magnets, in discharging the air of its opposite elementa, has been clearly demonstrated by the Electrometer, when unmagnetized points have shown but slight results, though placed under the same conditions. In fact, they gather and aliently discharge electricity from the atmosphere when you would scarcely suspect any being prosent.

These improvements being secured by double letters patent, you are hereby cautioned against laying yourselves liable, by purchasing of those who are not authorized, or who are substituting inferior imitations. All agents duly appointed can show their certificates. Have good rods or none.

CHARLES W. HEYDON.

I do hersby certify that I have applied various powerful chemical reagents to Spratt's Patent Points for Lightning-Rods, and that the results of these experiments convince me that they will resist the action of atmospheric causes, and thoreby preserve the extremity sharp—a condition most essential to protection against lightning. The reagents used in the above experiments were a solution of chloride of sodium, (common sait,) scotic acid, sulphuric acid, and hydrochloric acid. With the first, there was no action on the metal; with the several acids, there was very slight—a fact sufficient to show that atmospheric influences would have no sensible effect.

This may certify that I have examined, somewhat critically, James Spratt's Patent Lightning Rods, and that I am of opinion that it is constructed on scientific principles. For combining durability, cheapness, and-efficacy, I deem it equal, and I think superior, to any other rod ever offered for my inspection.

This will certify that I have examined the lightning Rods, Metallic Points, and Isolating Attachments, manuscurved by Mr. Spratt, and regard them as constructed in conformity to the general laws of the electric fluid; and the metallic compound constituting the Points, as promising, roa the result of several tests to which they were submitted, to resist for years the action of those atmospheric causes most likely to corrode them.

The Lightning Conductors put up by Mr. Henry M. PROSPECTUS OF THE

COTTON PLANT.

A SOUTHERN JOURNAL, PUBLISHED WEEKLY, TO ADVOCATE DIRECT TRADE, MANUFACTURES, AGRICULTURE, AND THE DEVEL-OPMENT OF SOUTHERN RESOURCES,

BY C. G. BAYLOR,

WASHINGTON, D. C.

THE importance of such a journal as the above needs no exposition. The material and substantial interests of the South have been too long neglected. The "Corron Plant" is established to promote these interests, keeping entirely aloof from party or party politics. A complete for firm and domestic correspondence has been arranged. The cent talent of the country will contribute to our columns. which will present a medium of general communication, cor-respondence, and information for the friends of the measures respondence, and information for the intends of its measures, we advocate. The proper steps have been taken in Europe and America to lay the foundation of a direct foreign trade at the Soute, and to introduce our causes manufactures into the continental European market. One object of the "Corrow Plant" will be, as the organ of direct trade, to stimulate the South to carry out this important measure.

We call upon the Southern merchants generally to send us their business cards, that we may keep them before the

us their business cards, that we may lay them before the country, to enable the friends of Southern commerce, manufactures, &c., to discriminate properly in their desire to pronote Southern enterprise.

The importance of Washington City, as a point of location for such a journal, especially in regard to opening foreign correspond nee and promoting our foreign relations, is ap-parent. The opportunity of seeing here, also, members of

Congress from every district of the country, presents members of general co-operation not to be found elsewhere.

To the Cotton, Sugar, Rice, and Tobacco Planters, we look confidently for support; and to the friends of "Direct Trade" throughout the South we say, "show your faith by your works." our works."
The regular issue of the "Corron Plant" will commence

The regular issue of the "Cotton Plant" will commence in June next. Advertisements are particularly requested to be forwarded early. Business letters addressed to C.G. Baylon, Washington City, D. Correspondence from all interested in the cause we advocate is solicited, particularly as to the crop, as we wish to give correct information on a surject which is of so much importance to the Planter, and in representing which he has been so often injured.

Postmasters are requested to act as agents for us: and to all who approve our cause we look for good feeling, kindness, and support.

TERMS: Two dollars a year, in advance. We, the undersigned, Senators and Representatives, cordially recommend the above journal to the confidence and support of the South

The late Compromise measures are now sanc-

laws, and respect them, and silence their opposition to them. The Compromise laws were intended to prevent weakening of our bond of union, and they now

produce that effect. The wound they closed will be permanently healed "by the first intention," as surgeons express it, but may become more malignant by

being reopened.

Real friends of the Union are opposed to this measure as unnecessary, cruel, and pernicious. The tranquillity of the country is preferred by given general satisfaction to the government.

some, while others prefer any excitement in which they may be magnified into importance. The WHIG PARTY, if ever necessary, is so nowcontending as it does for the true, permanent interests and honor of the country.

The doctrine of PROTECTION is a Whig doctrine, and our country has ever been benefited by its practical observance. The improvement of our lakes, harbors, and rivers is a Whig measure, and its vigorous en-

forcement is called for by the dearest interests of the nation. Either of these two subjects, being of practical importance, should have precedence, in party organizations, to questions not practical, or not

The best bond of our national union, moreover, is the existence of two national parties that embrace the two extremes of the Union.

peculiarly affecting the doctrines of national

The forcing a National Convention to adopt eclarations on subjects not affecting their party organizations is an act of wanton tyranny, tending to the dissolution of the Union. The Democratic party has always possessed

the support of at least one State whose avowed desire was disunion, but it never disowned or denounced that State, nor permitted any declaration to be made calculated to alienate its support. When Mr. Clay was believed likely to be elected in 1844, the Democratic party woodd and won

election of Mr. Polk. The Democratic party now desires that vote, and has no other purpose in its arrogant demands upon General Scott than to force him into making some special declarations by means of which they can misrepresent him on this extraneous subject.

General Scott's opinions are as extensively known on the Compromise as are those of any other man now before the people. General Scott was a Compromise man when some who are striving to ride upon that hobby were unwilling to approve of it, and when one

very distinguished Compromise man had in his

pocket his written reasons for opposing all its measures! The Democrats wish to elect a Democrat; they say the Compromise measures are popular; they say Mr. Fillmore and Mr. Webster are Compromise men; they say General Scott cannot be trusted; and yet they wish the Whigs to nominate Mr. Fillmore or Mr. Webster. All the parts of

this scheme do not hang well together. The whole tenor of General Scott's life proves him all we want in a President; and electioneer ing declarations should not weigh heavier than

A Proper Suggestion. Economy in the administration of our government is with us a favorite and cherished object: and we regard true economy as calling for libera compensation to good and efficient men in every department of the service-not fortunes to the few and niggard compensation to the many, but fair compensation to all, and the retention of no imbeciles or idlers. We therefore give place to the following with our hearty commendation, believing that the enhanced prices of provisions, labor, rents, and everything else, demand the measure here recommended:

MESSES. EDITORS: It is an undeniable fact that marketing is now twenty-five to fifty per very man of moderate income, who has children

to educate, feels himself sore y pressed. Ten years ago, when a similar rise took place. Congress added twenty per cent. to the salaries of clerks in the executive departments. Ought not a similar beneficent measure to be adopted by he present Congress ? The pendency of the deficiency bill affords a fair opportunity for members to be as liberal and just towards these clerks is they are to their own. If they are justified, at the close of every session, when their hearts are in the "molting mood," to give \$250 extra pay to their own clerks and messengers, would it no be fair, during the present pressure, to go some
